The Perfect Blend of Style, Functionality, & Outdoor Connection

The contemporary Aspen design is the perfect fit for any setting. Whether it's a coastal escape, a rural retreat, or an urban oasis, it is always a dream home. At the heart of the home is the central living space, featuring a sleek kitchen and generous scullery. An environment offering plenty of room to cook, create, and entertain. Over-height stacker doors on either side fill the space with natural light an allow for a stunning range of view. This seamlessly connects the indoors to the outdoors, ideal for alfresco living. The super-sized master suite offers privacy and comfort, located thoughtfully at one end of the home. Three double bedrooms are at the opposite end of the home, helping to create a perfect balance of shared and private spaces.

The Aspen is available in both Skillion and Gable roofing profiles.
